

Assembly presentation

Recycling – what's it all about?

The problem with rubbish

Why recycle?

25

X

=

FLEECE

Recycling transforms things:

25 plastic bottles can be recycled to make one new fleece jacket.

Why recycle?

The illustration is set against a light green background. On the left, there are three recycling bins: a red one with a white lid, a white one, and a grey one with a white recycling symbol. To the right of the bins, the word "protects" is written in white. Further right is a vibrant illustration of a tropical rainforest with tall trees, a toucan perched on a branch, a monkey swinging on a vine, and purple butterflies on the forest floor.

Recycling helps conserve natural resources:
Recycling aluminium cans helps to protect tropical rainforests by reducing the need to mine bauxite, the raw material used to make aluminium.

Why recycle?

Recycling saves energy:

Recycling one glass bottle or jar saves enough energy to run a Nintendo Wii for 5 hours!

Why recycle?

Recycling helps tackle climate change:

Recycling 1 tonne of paper saves 1.32 tonnes of CO²
– the equivalent of not driving 3700 miles.

What can **you** do?

Remember... your actions make a difference
